

Buddy is making fruit smoothies for 6 people. The recipe he has won't be enough so he is going to make $2\frac{1}{3}$ times that amount. Use area models to help him determine the amount of each of the ingredients he needs for this recipe.

Show your work on the back.

Ice and Strawberries: $2\frac{1}{3} \times 1\frac{1}{2}C$. New amount of Ice and Strawberries _____

Yogurt: $2\frac{1}{3} \times \frac{3}{4}C$. New Amount of Yogurt: _____
